

INDICATIONS:

by lincomycin and spectinomycin sensitive micro-organisms, like Campylobacter, E. coli, Mycoplasma, Salmonella, Staphylococcus, Streptococcus, and Treponema spp., in Calves, Lambs, Kids, poultry, and turkeys. The combination of lincomycin and spectinomycin acts additive and in some cases synergistic. Spectinomycin acts bacteriostatic or bactericidal, depending on the dose, against mainly Gram -ve bacteria like Campylobacter, E. coli, Mycoplasma and Salmonella spp. Lincomycin acts bacteriostatic against mainly Gram +ve bacteria like Mycoplasma, Staphylococcus, Streptococcus and Treponema spp.Cross resistance of lincomycin with macrolides can occur.

Gastrointestinal and respiratory infections caused

SIDE EFFECTS:

In the event of overdose in pigs, a change in the consistency of the faeces (soft faeces and/or diarrhoea) may be observed. In chickens treated at several times the recommended dose, enlargement of the caecum and abnormal caecum content was observed.

DOSAGE AND ADMINISTRATION:

ANTIBIOTIC

For oral administration:

Calves, Lambs and Kids: 1.50 gram per 100 kg body weight for 5 days.

Poultry: 150 gm per 200 drinking water for 5 - 7 days.

WITHDRAWAL PERIOD:

Calves, Lambs and Kids: Meat: 14 days.

Poultry: Meat: 5 days.

Egg: Do not administer for layers producing eggs for human consumption.

> Keep it In the Close container below 25°C

USED FOR

Calves & Poultry
