Eucalyptus Oil .....	10,000 mg
Thyme Oil.....	10,000 mg
Peppermint Oil .....	15,000 mg
L-Menthol.....	20,000 mg
Camphor .....	10,000 mg

# VITAVET AIR-MAX

**BOTANICAL ESSENTIAL OIL COMBINATION**

**FEED ADDITIVES EMULSION**

**WELL BALANCED BOTANICAL ESSENTIAL OIL.**

### INDICATIONS:

VITAVET AIR-MAX an oral solution used to relieve heat and respiratory distress in animals. The well-balanced composition features essential oils like rosemary, mint, eucalyptus, and thyme, promoting respiration through bronchial dilation. Enhanced with pure L-Menthol and Camphor, this blend effectively addresses heat stress symptoms, optimizing body weight and increasing fat content through improved feed intake. Eucalyptus oil provides expectorant, bronchodilator, and refreshing benefits, while Thyme oil relaxes air passages, promoting feed intake and weight gain. Peppermint oil and L-Menthol offer anti-tussive and appetizing effects.

VITAVET AIR-MAX is used for respiratory enhancement, post-vaccination relief, support against oxidative stress, pathogen load reduction, improved carcass quality, and regulated food intake during viral and bacterial diseases.

In severe conditions, administration through drinking water and spraying where it will optimizes the farm climate, especially in high-density, dusty environments, ensuring comprehensive animal well-being.

### SIDE EFFECTS:

No undesirable effects are to be expected when the prescribed dosage regimen is followed

### WITHDRAWAL PERIOD:

Meat, Milk & Eggs :None

## DOSAGE AND ADMINISTRATION:

### For oral use.

**Broiler :** 250ml of VITAVET AIR-MAX per 1,000L of the drinking water depending on severity of heat stress syndrome.
