

COMPOSITION :

Each 10 KG contains :

Sodium Chloride.....	620 GM
Potassium Chloride	400 GM
Sodium Carbonate	300 GM
Sodium Citrate.....	650 GM
Calcium Acetate.....	170 GM
Magnesium Sulphate.....	100 GM
Dextrose.....	7700 GM
Vitamin C.....	60 GM

ELECTROLYTE+C 2kg
10kg**ELECTROLYTE & VITAMIN C POWDER**
for Oral Administration**INDICATIONS:**

VITAVET ELECTROLYTE + C is a balanced electrolyte powder for horse and camels, to be used as a supplemental source of Energy, Calcium, Salt, Potassium, Magnesium and Vitamin C.

Other use:

Electrolytes should be used during exposure to or illness (scours and pneumonia) and/or during times of stress (including but not limited to:

handling and transporting, hot or cold weather, co-mingling, weaning or other stressors).

Cleanliness is very important - keep animal pens clean and well bedded, and scrub and sanitize feeding equipment after each use. Wash hands and clothing after handling sick animals. Offer fresh, clean water at all times.

Young animals may have increased nutrition requirements during very cold or hot weather. Consult with your veterinarian for guidance.

CONTRAINDICATIONS: None

WITHDRAWAL PERIOD: Meat, Milk :None

SIDE EFFECTS:

No undesirable effects are to be expected when the prescribed dosage regimen is followed

**DOSAGE AND ADMINISTRATION:**

Be incorporated into the drinking water or with feed after training, the following doses per animal per day:

Horses & Camels:

30 - 50 gm daily in one dose or can be divided to 2 doses.

IMPORTANT:

Dehydration in young animals can be very serious. If scours worsen or do not improve, or if the animal appears dehydrated, contact your veterinarian.

Keep it in the close container a way from direct sun light below 25°C.

USED FOR

Horses & Camels.
