

COMPOSITION :

Each 1 KG contains :

Chromium Picolinate	2,000 mg
Selenium Yeast	50,000 mg
Bacillus subtilis spores	1,000 mg
Betaine HCl	100,000 mg
Carrier qs	1,000 gm

VITAVET EGG BOOSTER

WATER SOLUBLE POWDER FOR ORAL ADMINISTRATION

INDICATIONS:

VITAVET EGG BOOSTER is a high-potency premix for layers, breeders, broilers, turkeys, ducks, and quails, formulated to boost egg output, fertility, and feed efficiency while strengthening immunity and stress resistance.

Improves egg production and quality: Enhances reproductive metabolism, egg weight, shell strength, and laying persistency.

Optimizes feed conversion: Chromium supports efficient energy and nutrient use for better FCR and uniform growth.

Reinforces immunity and antioxidants: Selenium yeast protects cells and improves resilience during heat or disease stress.

Supports gut health: Bacillus subtilis maintains balanced microflora and nutrient absorption.

Enhances heat-stress tolerance: Betaine aids hydration and enzyme stability, reducing losses in hot or transport conditions.

Use during laying peaks, heat stress, or recovery after antibiotics or vaccination to sustain high performance and egg quality across all poultry species.

INTERACTIONS WITH OTHER MEDICATIONS:

None.

WITHDRAWAL PERIOD:

Meat: 0 day, Egg: 0 day

DOSAGE AND ADMINISTRATION:

For oral administration

Poultry: Feed Application:

Mix 1 kg of EGG BOOSTER per 1 ton of finished feed. Ensure uniform mixing for even distribution of active ingredients.

Use continuously during production or stress periods for best results.

Water Application (optional): Dissolve 100 g per 200 liters of clean drinking water.

Administer for 3-5 consecutive days during stress, vaccination, transport, or heat-stress periods.

Keep it in the original packing below 30°C

USED FOR

Poultry
