

COMPOSITION :

Each 1 ml contains:

Pepsin (1:10,000 activity)	6.70 mg
Betaine Hydrochloride	70.60 mg
Potassium Chloride	0.70 mg
Calcium Chloride	0.048 mg
Magnesium Sulphate	2.50 mg
Dicalcium Phosphate	2.50 mg
Polymethylsiloxane	26.40 mg

VITAVET ENZYPHARCO-B

FEED ADDITIVE ORAL SUSPENSION

DESCRIPTION: *VITAVET ENZYPHARCO-B* is a dual-action digestive and acidifier feed supplement formulated with Pepsin and Betaine Hydrochloride to support healthy gut function and improve feed utilization. It maintains favorable gastric acidity, promotes better nutrient absorption, and encourages steady appetite in livestock and poultry under intensive feeding conditions.

INDICATIONS: For use in Camels, Calves, Lambs and Kids, puppies, Rabbits, and Poultry as a digestive and antifoaming oral suspension. Designed for livestock and poultry as a feed supplement to support natural digestion and nutrient utilization. Recommended during periods of dietary stress, feed change, or low appetite to maintain healthy gut function and improve feed efficiency. Enhances protein digestion by enzymatic activity and maintains optimal gastric acidity for better nutrient absorption.

CONTRAINDICATIONS: Not recommended for animals with active gastric ulceration or feed already containing high levels of acidifiers or enzymes. Avoid mixing with alkaline additives.

**STORE IN CLOSE CONTAINER
BETWEEN 15 °C and 30 °C.**

DOSAGE AND ADMINISTRATION:

(FOR ORAL ADMINISTRATION):

Administer *VITAVET ENZYPHARCO-B* Oral Suspension by mouth or mix uniformly with feed, milk, or drinking water.

Camels: 40–50 mL twice daily, given directly or mixed with feed or milk during digestive stress, heat, or reduced appetite.

Calves: 20 mL twice daily after feeding or with milk.

Lambs / Kids: 10 mL twice daily or in milk replacer during weaning.

Puppies: 5 mL twice daily.

Young Rabbits: 15–30 mL in drinking water once or twice daily.

Poultry / Small Livestock: 1 mL per litre of drinking water.

Use for 3–5 days during stress, feed change, or indigestion, and 2–3 times weekly for routine digestive support.

Mix with feed, milk, or water if diluted.

Ensure constant access to fresh water.

USED FOR

Camels, Calves, Lambs and Kids, puppies, Rabbits, and Poultry.
